

Collapsed unopened meshes

Installed open meshes

Here's how to order.

First determine what height you need; 18", 24", 30" or 36".

Then measure the length of your project.

Now order by using the correct **length multiplier** shown below.

Height	Length multiplier	Part number
18"	1.2 times length of coverage, round up to next foot.	NESLIFELINE1
24"	1.35 times length of coverage, round up to next foot.	NESLIFELINE1
Height	Length multiplier	Part number
30"	1.25 times length of coverage, round up to next foot.	NESLIFELINE2
36"	1.4 times length of coverage, round up to next foot.	NESLIFELINE2

Be sure to order the correct part number for the netting height you need!
